

Sir  
**Luke**

# bio

Luke Younts has spent years making a name for himself throughout the Atlanta DJ culture, mixing under the moniker SirLuke. At every event, he brings a level of class while keeping the energy on high. SirLuke is a real working DJ, entertaining a new crowd every week. This guarantees he can bring the heat no matter the circumstances.

At the age of 11, Luke began to learn the bass guitar, and you could say this is where his passion for music started. The instrument opened Luke's eyes to the powerful grooves and the universality of music. Over the years, he has been touring the greater Atlanta area sharing his love of music by playing in a funk-rock band. After witnessing the art of DJing at a music festival, SirLuke was inspired by how one person could move an entire crowd with music. It's then and there he would decide to bring his talents to the DJ booth. SirLuke continues to incorporate funky soul into his DJ sets, whether the night calls for a variety of genres or the house music he fell in love with.

Luke started his professional DJ career his sophomore year at Kennesaw State University earning his own clients and freelancing for other entertainment companies. SirLuke's talents are now available exclusively through One Night Entertainment. Since linking up with the DJs at One Night, SirLuke has been able to put his spin on weddings and corporate events. Luke's clients are lucky to have such a fresh and talented rockstar hosting their celebration.
